

This is an explanation of how to fix an error when the Sygic update utility won't read your SD card

- First you will need to download the zipped files off our website, which can be located in the downloads section.
- Save the zipped file on to your computer, once the download has finished you will need to unzip the **WindowsCE** folder.
- Inside the **WindowsCE** folder you will find 3 different files, **drive, drivecore and library**, select all of the 3 files, and right click with the mouse and copy.
- Put your Sygic map SD card into your computer
- Open your SD card, open the **WindowsCE** folder and paste the 3 files you have copied.
- It will bring up a box asking if you want to replace these current files, **click yes.**
- Once it has finished, eject your SD card then put it back into your vehicle, start application.
- Remove SD card from in dash device, reinsert back into pc and the update utility will load automatically.
